

Parking Lot Machines

Effective May 4, 2026 paid parking is back in effect in the City lots due to the new machines have been installed.

- 1) The machine will likely be in sleep mode when you approach it, so you will have to wake it up by pushing the green “press start first” button on the right.
- 2) The machine will take cash, credit card and phone payment. There are no numbers on the parking spaces; instead, you will enter your car’s license plate number when you pay for your parking. If you haven’t memorized your license plate number, you could take a picture of your plate with your phone for convenience, so you have it handy at the machine.

The City of Corning operates the parking machines and oversees the lots. If you have questions or issues with the machines, contact the City Finance Office at: 607-962-0340 ext 1149.
